ABE HIEBERT

SOFTWARE DEVELOPER & FOUNDER

Bayfield, Ontario, Canada • abehiebert1131@gmail.com • 519-955-4156
baronyco.com • ironcladpulse.app • storeresolve.com • xinerent.com.ng

SUMMARY

Self-taught full-stack developer and founder of **Barony**, an Ontario software house. I ship complete products alone — database and auth through payments, deployment and iteration — for my own portfolio of 13 products and for paying clients. TypeScript, React, Next.js, React Native/Expo, Python, Swift. Open to remote roles and contract work where shipped work counts more than credentials.

CLIENT WORK

XineRent — Lead Software Engineer (Contract)

Film-premiere platform built end to end for the founder, live in production at xinerent.com.ng: registration, claim-based admin authorization, filmmaker approval workflow, server-side film submissions, scheduling-conflict rules, payments and settlement integrity, moderation. Ten milestones delivered, then a founder-audit corrective programme — 558-test suite, all critical findings fixed and re-verified. Firebase, JavaScript, Netlify/Vercel.

WHAT I SHIP

Ironclad Pulse — Founder / Developer · ironcladpulse.app

Cash-flow SaaS for freelancers, agencies and contractors. Scores invoice late-payment risk, sends escalating follow-up sequences automatically, and forecasts 90-day cash flow. Live Stripe billing. Next.js, TypeScript, Supabase, Stripe, Vercel.

Store Resolve — Founder / Developer · storeresolve.com

AI support agent for Shopify merchants. Resolves orders, refunds and cancellations inside merchant-set limits and escalates the rest. Shopify OAuth and GraphQL order lookup, public chat widget, certified subscription billing. TypeScript, Firebase, Vertex AI.

Quomaro — Founder / Developer

RFQ, quoting and job management built for CNC machine shops. Windows-first, local AI only — customer documents never leave the device. Stripe billing live. TypeScript, React, Tauri, Transformers.js.

AppFlow — Founder / Developer · app-flow.app

Multi-tenant release and operations platform for mobile teams. Wraps App Store Connect with a nine-point release readiness check, encrypted credential storage, idempotent Apple webhooks, strict per-workspace isolation and Stripe billing.

TEAM EXPERIENCE

Shimpilot — Co-founder, Growth & GTM · 2026

Developer tooling that watches Stripe, OpenAI, Supabase and AWS APIs for breaking changes, traces affected call sites, generates migrations and proves them in CI. Led growth and user research, turning developer feedback directly into product changes.

ALSO BUILT

Aurivox: Local-first transcription app, revenue-live on the Microsoft Store ($9.99/mo). **SnapSite:** Job-operations platform for contractors with on-device AI. **AgentTether:** Spend controls and hard limits for teams running AI agents. **OmniPlayer:** Cross-platform media player with real VLC playback. **BaleOps:** Offline-first dispatch and invoicing for custom hay-baling crews. **REA Studio:** Realtor platform with Firebase Auth + Stripe billing live. **Scroll & Dawn:** Premium immersive biblical storytelling platform. **Cloak:** Local-first student communications app.

SKILLS

Languages	TypeScript · JavaScript · Python · Swift · SQL · HTML/CSS
Frameworks	React · Next.js · React Native · Expo · SwiftUI · Node.js · Flutter · Unity
Backend & Cloud	Supabase · Firebase · REST APIs · GraphQL · Shopify · Auth · Stripe · Vercel
AI	AI Integration · Agents · Local LLMs · Automation
Tools	Git/GitHub · Xcode

How I work: I take a product from idea to something people can pay for and use. I read codebases fast, debug my own work, and ship without being handed a task list.
